	STREET ADDI SUMMARY STATEMENT OF DEFICIENCES (EACH DEFICENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC DENTIFYING INFORMATION) Continued From page 2 A facility Incident Report dated 01/04/09 at 11:20 PM, indicated the patient was found on the floor on his side by a CNA. The patient sustained a minor skin tear on the right elbow and a scratch on the right knee with dressings applied. The patient had just been cleaned earlier and was given a pain pill at 10:00 PM thru the PEG (percutaneous endoscopic gastrostomy) tube. The physician was called three times before staff finally got a hold of him at 12:15 AM and was informed of the incident. The patient was transferred to a medical floor. The patient's mentation at the time he fell was described as having periods of confusion. The patient had been reminded to use the call light several times and had been visited every now and then. Per the Charge Nurse the patient had 4 side rails up and a bed alarm on at the time of the fall. A CNA had cleaned the patient up 30 minutes prior to the fall and left the call light in reach. The facility's Fall Risk Assessment and Prevention House Wide Policy last reviewed 08/15/06 indicated under Purpose: 1. To identify patients at high risk for falls and prevent/reduce the possibility of injury from a fall. 2. Fall prevention interventions will be implemented according to risk level as defined in the procedure section. 3. Fall risk assessment will be completed on admission and every 12 hours, with change in condition, such as immediate post op patients, transfers to another department or in the event of a fall.			\$ 300		fety fair, a licy, and raint ar 3, 2009 yees. vill be ven a level ans will be ammittees gs. nurse ention and who starts dual will g: a hospital a related to with lion of the care
